## Developer-driven standards...

## ...that drive business results

### Rely on robust APIs

We power 1.5T requests per year for 10K+ customers all over the world. Our APIs are written for performance and scalability first.

### For every developer

Use your preferred language to prototype ideas quickly and build production ready experience in no time with documentation and tools for every stack.

### Packaged building blocks

Don't build from scratch and leverage API building blocks to deliver the right content within milliseconds via search, navigation and recommendations.

### Improved business results

Get relevant content to the right person in milliseconds. Run continuous optimizations to generate higher conversions across any industry.

### True omnichannel capability

Roll out and manage multiple consistent experiences across different brands, divisions and portfolios from one platform.

### Improved competitiveness

Implement a new digital experience in days instead of months or iterate on offerings without impacting your backend.
